

DEPARTMENT OF THE ARMY
40TH ARMY FIELD SUPPORT BRIGADE (AFSB)
KANDAHAR AIRFIELD, AFGHANISTAN
APO AE 9008

August 14, 2009

To Whom It May Concern,

As the Contracting Officer Representative (COR) for the 40th Army Field Support Brigade and on behalf of Army Materiel Command, I would like to recognize the outstanding support we have received from Mr. R. Robert Carver, President-CSO North American Technology Logistics & Support Services (NatLASS) and his professional staff.

Mr. Carver has provided excellent customer service and has been extremely responsive to our mission essential requirement to construct for immediate occupation, ten, 77' x 104' K-Space temporary facilities. These facilities were critical to the support of United States combat forces in Southern Afghanistan. Mr. Carver and his hard working team were able to facilitate beneficial occupancy of these structures well ahead of the contractual period of performance and spend no effort moving the projects forward understanding the urgency of getting these facilities into operation.

I offer my utmost commendation to the efficiency, professionalism and creative understanding of the contractor's requirements Mr. Carver brings to project management for NATLASS. The K-Space structures that have been provided exceeded expectations.

Paul T. Carothers
Lieutenant Colonel, US Army

RE: Eagle Prime Beef Foundation Letters

Answer,

I want to take the opportunity to thank NATLASS as a whole and you personally for your assistance on TOIFOR's letter project for Eagle Prime Beef Foundation here on IAF.

When we came to you in March we were in a situation where progress was in jeopardy of slipping due to incorrect and substandard materials and we needed a partner who could provide labor and materials to get us back on track and get the project wrapped up, NATLASS certainly did that for us.

At every cycle when we had minor changes or needed additional work (change requests & addition of fence grounding where another contractor left through) your guys were there and quickly reacted. When small problems were noted by the inspectors, your guys implemented the requests and made the needed changes. Time and time again, your crew came through for us. Special acknowledgement goes to Shafiq for his leadership and knowledge of U.S. MIL and the requirements that come with it.

It was noted by the inspector that this was one of the few sites he had been involved in that had no electrical issues resulting in violation of the Fire Dept inspection. This is truly a compliment to the entire NATLASS electrical team from top to bottom.

The bottom line is TOIFOR would like to extend our appreciation and admiration for the way NATLASS performed with us on this project as a key partner in fulfilling our requirements, meeting the customer's needs, and supporting U.S. soldiers and civilians in their mission.

With sincere appreciation and regards,

Matthew "Red" Matheson
Deputy PM, TOIFOR CI
